SUMMARY

Aspiring Software Developer skilled and proficient in Python, C#, Java, JavaScript, HTML, and CSS. I am a hard and dedicated worker. One who will lock into the task at hand and won't stop until it's done. I like coding in my free time to keep my skills fresh and learn new things. It's also just a lot of fun. Recently, I've been coding a lot in C# and JavaScript for my college courses and am excited to continue my education to broaden my coding knowledge.

WORK EXPERIENCE

Proactive Software Engineer Intern

Intellicomp Technologies   **May 2025 - August 2025**

Responsible for maintaining and updating various real and virtual machines using Ninja RMM.
- Completed and logged various tickets using best practices on the Halo ticketing service. Including storage space, domain registration, SSL certification, and VEEAM backup tickets
- Maintained Huntress security software while being in direct contact with Huntress support
- Triaged and fixed errors for Windows 11 machines while pushing out the 24h2 version update. Made Excel spreadsheets of any ineligible machines and Windows 10 machines with errors, for handoff to the helpdesk and sales department, with relevant notes in Halo.
